

**Basic information about the organization of the solid state physics seminar  
in hybrid mode.  
(version 1.0)**

The seminar in hybrid mode takes place:

1) stationary at the Faculty of Physics, University of Warsaw, room 0.06

2) is simultaneously made available remotely using the Zoom program.

ad 1) In accordance with the rules defined by Rector:

- It is mandatory to cover the mouth and nose with a face mask in the UW buildings.
- Due to the nature of classes, academic teachers can decide that participants may not wear face masks.
- Academic teachers are not obliged to cover their mouth and nose.

I would like to ask people participating in the seminar on-site to take their seats with the observance of spacing.

People participating in the seminar on-site are asked to sign the list in the seminar notebook

ad 2)

On Friday, approx. 10:00 (it will work only after the session has been opened) you should connect to the website:

<https://zoom.us/j/7218838148>

(technical details below)

After joining the session, please turn off the microphone.

Using the "Chat" option in the menu, please send me (not to all) your name and surname in the text of the letter in order to create an attendance list. (**Only name and surname - no additions**. Other texts as required, in a separate letter).

The list obtained in this way will be attached to the one created in the stationary mode.

During the seminar, you can turn on the microphone and ask the questions.

During the discussion you can use the "Raise Hand" option (bottom in the Participants window), but I may not notice it and then please just turn on the microphone and speak.

Best regards

Roman Stepniewski

In case of problems, visit:

<https://zoom.us/>

Choose: "Join A Meeting"

Provide: Meeting ID: 721 883 8148

Most often, just click the link, then agree to install the program (the first time you use it), accept the connection of "computer audio", and (yes or no) connect your own camera.

Sometimes the camera has to be turned on "manually" (icon in the bottom left corner).

If clicking the link does not lead to success, look for the option:

"If you cannot download or run the application, join from your browser."

By clicking the link, we go to the login window, where you will need: Meeting ID

This option works best with the Chrome browser (even for XP, but with problems).

Warning!!:

I know signals about problems with the Zoom application. I recommend:

1) Install the latest version of the program from the site:

<https://zoom.us/support/download>

2) Avoid unnecessary chat.
